1. About the program

ProMaster is a management system for a company technical service. It covers fault reports, repairs, spare parts warehouse, maintenance, utility systems and staff working time.

Purpose

- Fast logging and handling of equipment faults
- Planning and control of repair work (TWO)
- Spare parts and material movement tracking
- Maintenance control for machines and utility systems
- Working time, schedules and Saturday shifts
- Push notifications to phones (vibration and sound)

Key features

- Roles: administrator, head of technical service, mechanic
- Status history per fault (date, time, user)
- Works on phone as an app (PWA)
- Work order approval, team hours reports
- Interface: RU / NL / PL / EN

2. Roles and access rights

Three main roles. Mechanics work with faults and repairs; management closes faults and approves orders; the administrator runs the system.

Action	Mechanic	Head TS	Admin
Faults: create and work	Yes	Yes	Yes
RESOLVED	Yes	Yes	Yes
CLOSED	No	Yes	Yes
TWO: work and checklist	Yes	Yes	Yes
TWO: approval	No	Yes	Yes
Warehouse: stock and moves	Yes	Yes	Yes
Warehouse: prices and delete	No	Yes	Yes
Purchasing	No	Yes	Yes
Analytics	No	Yes	Yes
Settings and users	No	No	Yes
Clock in / out	Yes	Yes	Yes

ProMaster

3. Sign in

1. Open the app URL or home-screen icon.
2. Enter username and password, click Sign in.
3. Change password on first login if prompted.

Working hours

Mechanics may be limited to their schedule. Outside hours the program shows a work-hours message. Admin can grant 24/7 access.

Language

Use RU / NL / PL / EN buttons in the top bar to switch language.

4. Dashboard

Mechanic

- Quick actions: new fault, TWO orders
- Time panel: CLOCK IN / OUT and current time
- Recent faults and assigned jobs

Management

- Priority stats and problem machines
- Overdue work orders
- Schedules and period analytics

5. Fault reports

Create a fault

1. Faults → New fault.
2. Title and problem description.
3. Machine / equipment and priority.
4. Photos and videos if needed.
5. Save — mechanics get a notification.

Statuses

Status	Meaning
New	Report created
Accepted	Taken by mechanic
Diagnosis	Finding the cause
In progress	Repair running
Paused	Stopped + reason
Waiting for part	Need a part
Testing	Check after repair
Resolved	Mechanic finished
Rejected	Rejected with reason
Closed	Management confirmed

Work timer

1. Start work starts the clock.
2. Only one active job at a time.
3. End work saves the duration.

Pause and close

- Pause requires a written reason.
- Mechanic sets Resolved; head sets Closed.
- Mechanics cannot close faults themselves.

6. Technical work orders (TWO)

1. TWO → New order.
2. Description, machine or area.
3. Assign mechanics and date.
4. Checklist, photos.

Approval

- Submit for approval → checked by head / admin.
- Approve or reject with a reason.

Execution

- Checklist, result, time, photos.
- Signature completes the order. Printable form.

7. Time tracking and schedule

- CLOCK IN / OUT on dashboard and Time tracking.
- Hours and overtime calculated (standard 8h).
- Schedule days and hours set by management.
- Working Saturdays assigned by head / admin.
- Reports: per employee and team (CSV).

8. Warehouse and spare parts

- View: name, part number, quantity. Prices hidden for mechanics.
- Incoming / outgoing with stock check.
- Reservations for orders or machines.
- Parts deducted in work reports.

Management

- Prices, inventory, CSV import, delete, purchasing.

9. Machines and equipment

- Catalogue: specs, photos, documents, history.
- QR code on machine for quick phone access.
- Mule Maintenance, knife sharpening, other devices.

10. Utility systems

- Gas: cylinders, components, orders, scanning.
- Compressed air: points, regulators, map, photos.
- Water: points and scheme, photos.
- Electricity: cabinets, breakers, outlets, plans.

11. Maintenance (PM)

- Maintenance calendar and plans with intervals.
- Create TWO from a plan.
- Equipment repairs with photos and reports.

12. Messages and notifications

- Chat and internal messages.
- Alerts for faults, TWO, approvals, warehouse.
- Phone vibration and sound.
- Test push — Schedule (admin only).

13. Settings and administration

- Users: accounts, roles, sections, password reset, 24/7.
- Switch user — view as employee (admin only).
- Group permissions and individual access.
- Database backup, audit log, CSV export.

14. Install on phone

Android (Chrome)

1. Open the site.
2. Menu → Install app.
3. ProMaster icon on the home screen.

iPhone (Safari)

1. Open the site in Safari.
 2. Share → Add to Home Screen.
 3. Add.
- Allow notifications for sound alerts.
 - Some data works offline.

15. FAQ

No notification

- Check app install and notification permissions.

Blocked outside hours

- Schedule limit. Admin can grant 24/7.

Cannot close a fault

- Closing is for head TS / admin. Set Resolved instead.

Photo will not open

- Click the thumbnail to open full size.

Working Saturday

- Assigned by head / admin: Schedule → Working Saturdays.

Forgot password

- Admin resets the password under Users.
